**Subject:** Application for Business Intelligence or Analytics Position

To whom it may concern

I am writing to express my interest in opportunities within the field of Business Intelligence and Analytics. With a Master's in Business Analytics & Big Data Systems and a Bachelor's in Accounting and Information Systems, I bring a strong foundation in both technical analysis and financial understanding.

I have over three years of hands-on experience in Accounting and Finance within the Maritime industry, where I worked on financial reporting, internal audits, and variance analysis. My business knowledge also spans Hardware & Household and Agricultural ventures, allowing me to adapt quickly to different operational environments.

Skilled in tools such as Excel, Power BI, SQL, Python, and Tableau, I specialize in transforming raw data into valuable insights that support strategic decision-making. I enjoy solving problems through data, creating interactive dashboards, and driving performance through analytics.

I am excited to bring my analytical mindset, business acumen, and technical skills to a challenging and dynamic environment. Thank you for considering my application. I look forward to the opportunity to contribute and grow in this field.

Yours sincerely

Md Yeashin Arafat
